INDONESIA FAMILY LIFE SURVEY EAST 2012
(SAKERTIM)

Good morning/afternoon/evening,

My name is ... and my colleague ... We are from Survey Meter, a research institution with its head office in Yogyakarta. We are presently carrying out a study on Aspects of Family Life in the Eastren part of Indonesia. We would like to interview you and other members of your household about your health and family life.

The purpose of this study is to measure the living conditions in easern part of Indonesia, how they are changing over time for different people. We are also concerned with knowing how to improve education, health care services and other aspect of family well being in the area.

Your household is one of the many households selected in in this study randomly and we are going to ask a number of questions to every member of your household. The questions relate to education, income, occupation, migration and other aspects of family life. If you have children less than 25 years old and are living with you in the same household, we would also like to have them take a cognitive test.

Later on our health team of 2 nurses will also visit. If you agree, they will measure your height, weight, take your waist and hip circumference (if you are over 40 years old), take your blood pressure and pulse and take a small blood sample from your fingers using a finger prick to know whether you or any member of your family suffered from anemia or high cholesterol.

We must assure you that the data is mainly for research purposes and not related to politics, taxation or other purposes, which will be detrimental to you or your family. Your identity and the identity of any member of your family will be kept secret and we will use the information given to us strictly in accordance with the purpose of this study. We will release data for Indonesian and other scientists to analyze, but these data will not have your names, address or any other information that could be used to identify you. All private identifying information will be removed from the data before it is released to the scientific community. In this way, people will be able to learn about the way government policies work here, but not what you personally said. You do not have to answer any questions you do not want to answer, or participate in any test in which you do not want to participate.

Will you allow my colleague and I to interview you and members of your household?

Thank you
